|---|--|---------------------------|
| Cleaner results are rated on a scale of 1 - 5 | 1-3: Causes discoloration. Not recommended | 4-5: *Recommended for use |
|---|--|---------------------------|

\*Cleaners only recommended if diluted per manufacturer's instructions.

Topical cleaners must be wiped off with clean water and dried with clean cloth following application.

The performance results shown in this chart are not guaranteed for all SII Vinyl and Polyurethane products.

The evaluations are indicators after laboratory tests and may not be indicative of field performance.

Healthcare facilities maintain disinfecting regimens to reduce the spread of infections. There is a wide variety of available biocides that include bleaches, peroxides and quaternary ammonium products, among others. They should always be used at the recommended dilution, never in concentrated form.

To prolong the life of digital or any other coated fabric, they should be rinsed off after the recommended residence time. It should be noted that misuse of disinfectants is the major source of surface deterioration. Spradling continually evaluates cleaners/disinfectants.
