

Remove most stains with one of the following steps:

|                        |  |
|------------------------|--|
| <b>Step 1</b>          | baby oil, ketchup, chocolate, motor oil, olive oil, tea, coffee                          |
| <b>Steps 2 &amp; 3</b> | eye shadow, crayon, grease, permanent felt tip marker, mustard, lipstick, ball point pen |

**Step 1:** If cleaned immediately, use a clean dry cotton fabric. Wipe once, careful to remove most of the stain without spreading to surrounding area. Wipe more vigorously a second time if residue remains and proceed to step 2.

**Step 2:** If residue remains use a straight application of the following concentrated cleaners:

- *Formula 409®*
- *Fantastik®*

Wipe with a clean cloth, rinse with water and dry. If residue remains, proceed to step 3.

**Step 3:** More stubborn soiling may be eliminated using a cotton fabric soaked in 91% isopropyl (rubbing) alcohol. Wipe without spreading stain to surrounding area. A second application should be applied with vigorous rubbing in a circular motion. For highly textured material, a soft toothbrush is recommended to clean valleys and crevices. Wipe with a clean cloth, rinse with water and dry.

## How It Works

**PERMAGUARD®**  
SUPERIOR STAIN RESISTANCE

Vinyl

Polyester Backing

**PERMAGUARD®** acts as an invisible barrier against stains, allowing them to be cleaned off the surface with ease and virtually no harm to the vinyl.

\*Please note, that **PERMAGUARD®** is not "stain proof" and indelible inks, particularly those containing certain dyes used in permanent felt tip markers, can leave a shadow if cleaning is delayed beyond 24 hours. Results are best when cleaned within the first 24 hours of staining.

This information is not a guarantee and does not relieve the user from the responsibility of the proper and safe use of the product and all cleaning agents. The use of certain agents can be harmful to the surface appearance and lifespan of vinyl. Spradling, its agents and assigns assume no responsibility resulting from the use of such cleaning agents to the vinyl. Certain clothing and accessory dyes (such as those used on denim jeans) may migrate to lighter colors. This phenomenon is increased by humidity and temperature and is irreversible. Please check compatibility when using this product in combination with painted or varnished surfaces.
